DATA ANALYSIS REPORT

Amazon Brazil → India
Strategic Insights & Business Recommendations

Milestone 02 | Data Analysis Using SQL | Amazon India Market Expansion

Analysis I · Analysis II · Analysis III

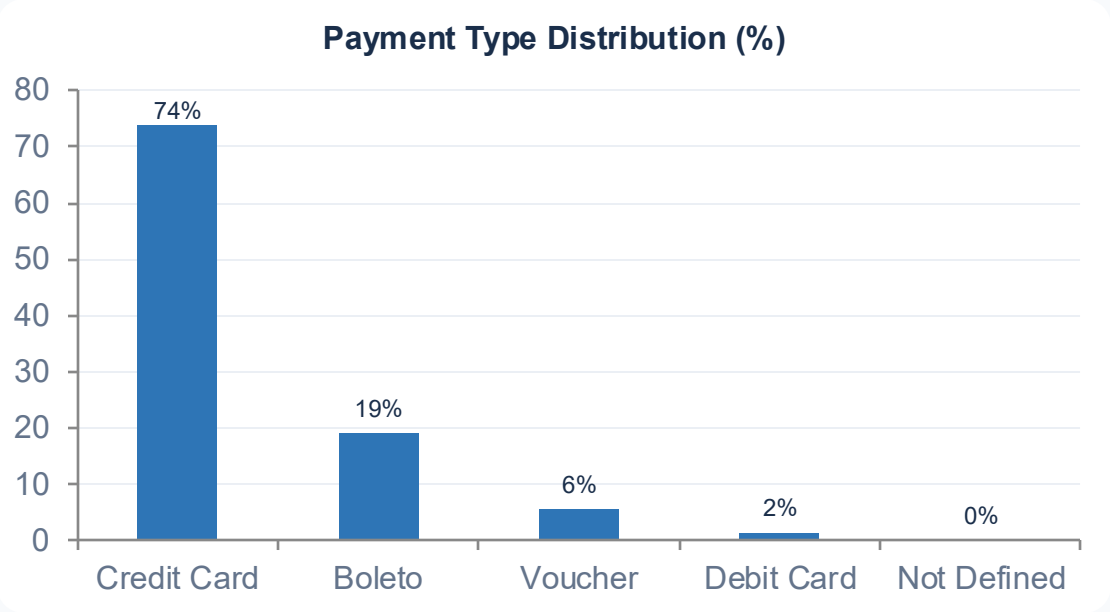
EXECUTIVE SUMMARY

~99K	Credit	Spring	Beauty
Total Orders	**Top Payment**	**Peak Season**	**Top Category**
in dataset	73.9% orders	BRL 4.2M sales	BRL 1.26M rev

KEY FINDINGS

- **Credit card** dominates **73.9%** of all transactions — digital payments infrastructure is critical for Amazon India. (Ref. Analysis – 1)
- **Spring Season (Mar–May)** generates highest sales at **BRL 4.2M**(42,16,722) — seasonal promotions must be front-loaded. (Ref. Analysis – 3)
- **Beleza_saude** is top revenue category {**BRL 1.26M**(12,57,865)}; **relogios_presentes** {BLR 1.2M(12,03,060)} is #2 high-margin categories to prioritize. (Ref. Analysis – 2)
- **94,635 'Occasiona**l' customers vs only **1,128 'Loyal'** — massive loyalty gap is the biggest opportunity for India. (Ref. Analysis – 4)
- **614** Products with **missing/incomplete names** detected — data quality improvements needed for catalog integrity. (Ref. Analysis – 1)

ANALYSIS I | Payment Behavior Insights



Avg Payment (Rounded) by Each Payment Type

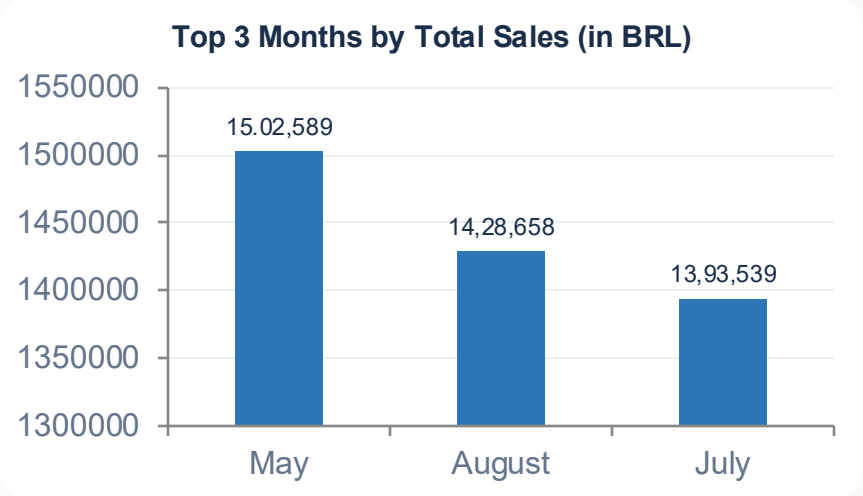
Credit Card: BRL 163
Debit Card: BRL 143
Boleto: BRL 145
Voucher: BRL 66
Not Defined: BRL 0

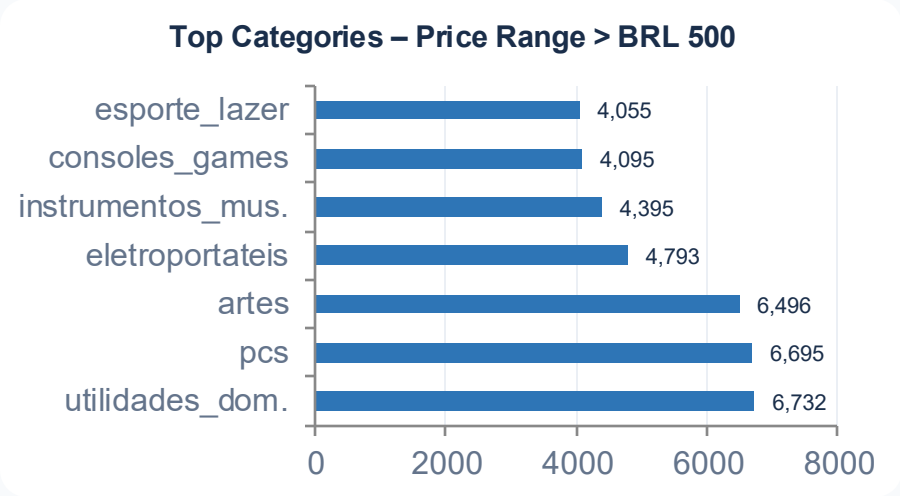
Lowest Std. Deviation (Most Consistent Transaction)

Not Defined: 0
Voucher: 115.52
Boleto: 213.58
Credit Card: 222.12
Debit Card: 245.79

💡 **Recommendation:** Amazon India should heavily invest in credit card payment infrastructure and UPI integration (Indian equivalent). Boleto-like Cash-on-Delivery (COD) represents 19% — maintain COD as a trust-building tool for Tier-2 & Tier-3 cities in India.

ANALYSIS I | Seasonal Sales & Price Variation

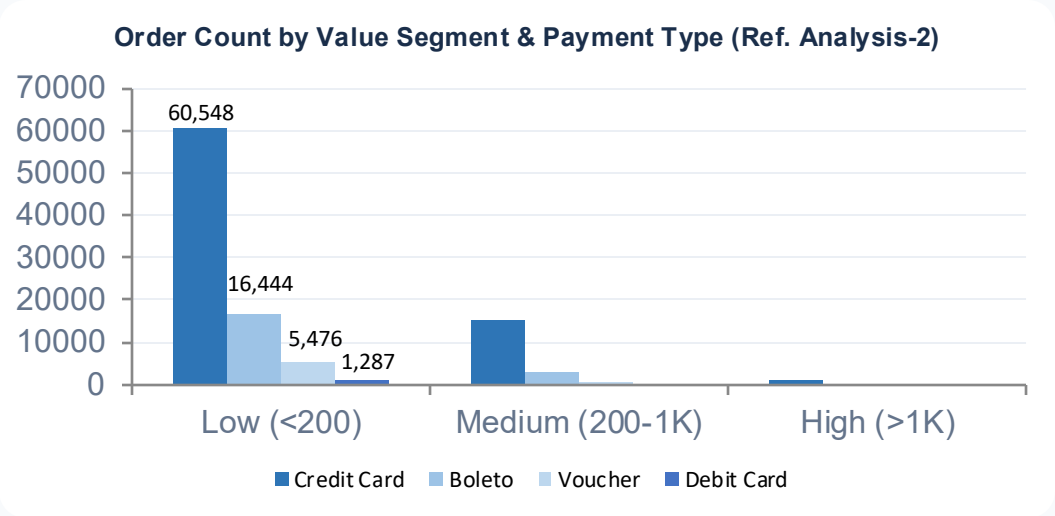


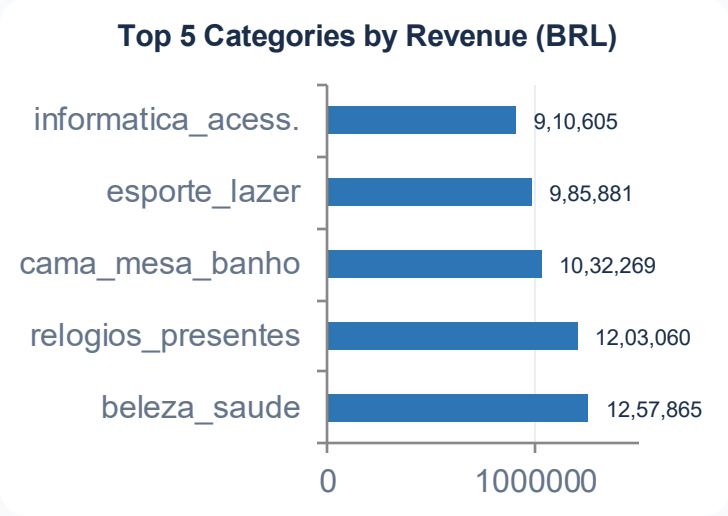


⚠ **Data Quality Alert:** Products detected with NULL(610 products) or single-character category names(4 Products) (e.g., 'c','f','t','w'). Total **614 products identified needing catalog correction**.

💡 **Recommendation:** Festival months (May–Aug) align with Brazil's high purchase months. India's festive season (Oct–Nov Diwali) must be Amazon India's peak campaign window. Categories with high price variance (electronics, sports) need dynamic pricing strategies.

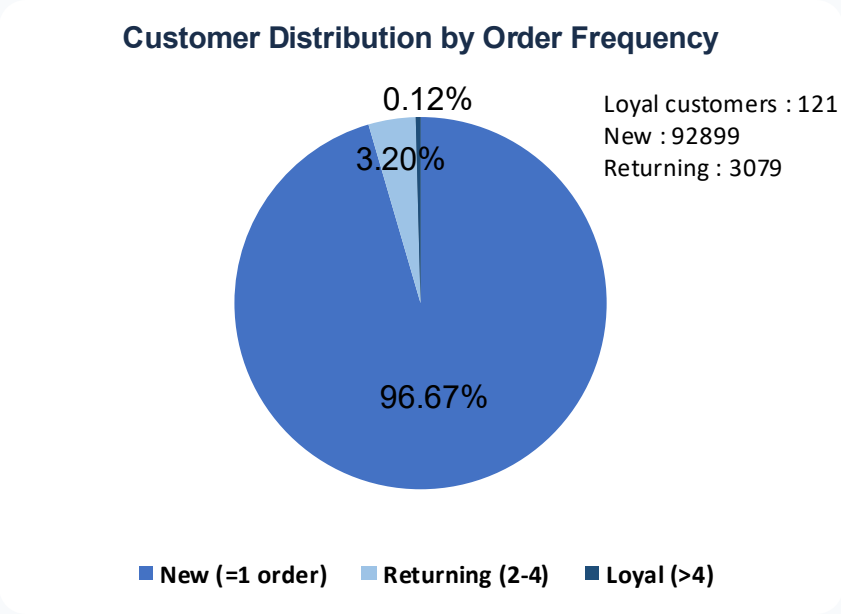
ANALYSIS II | Segments, Categories & Revenue





- Credit card dominates across ALL segments — partner with Indian banks for EMI offers to capture mid/high-value buyers.
- Low-value orders (< BRL 200) are the highest volume — price-sensitive buyers need frequent flash sales & coupons.
- Beauty, watches & home linen are top earners — replicate India-specific equivalents: skincare, sarees/home decor.

ANALYSIS II | Customer Segmentation & Loyalty



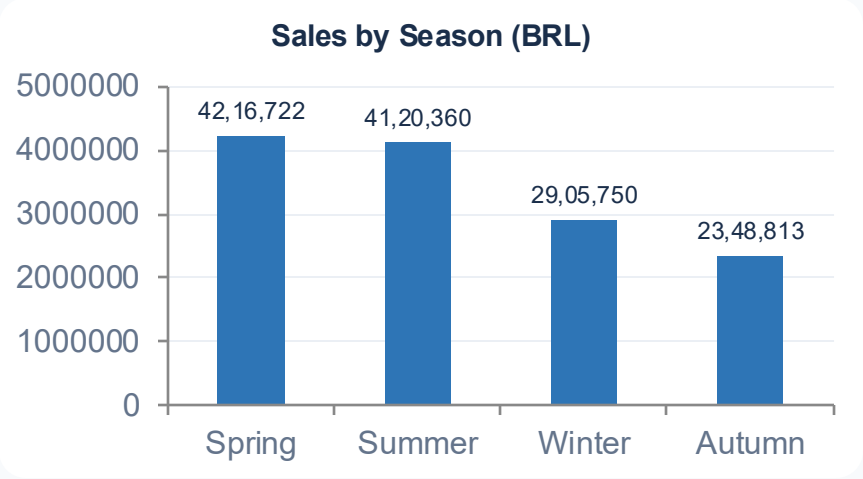
TOP HIGH-VALUE CUSTOMERS (Avg Order Value)

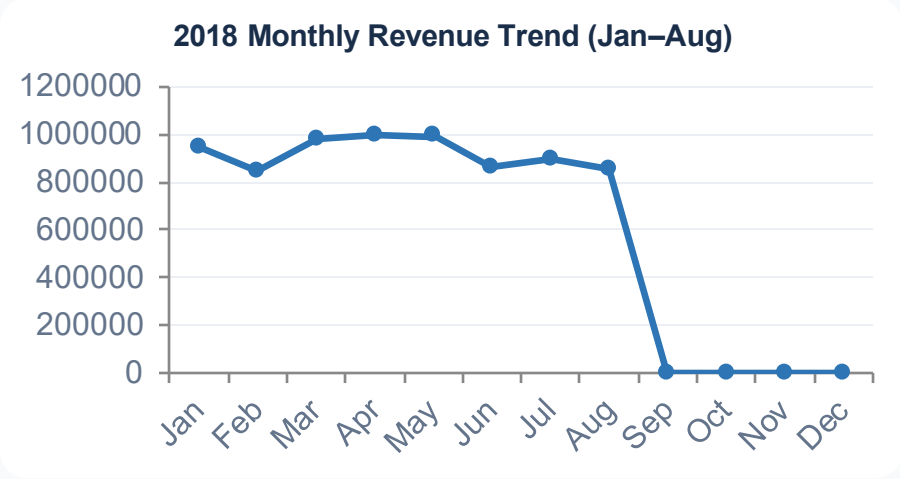
Rank	Avg Order (BRL)
#1	BRL 13,664
#2	BRL 7,275
#3	BRL 6,929
#4	BRL 6,922
#5	BRL 6,727

Returning Customers Finding:
The top repeat customers placed up to 16 orders — they are power users who can be targeted with exclusive Prime-like memberships. The vast majority (>94K) are one-time buyers, signalling a major re-engagement opportunity.

💡 **Recommendation:** Launch a tiered loyalty program (Bronze→Silver→Gold) modelled on these segments. Convert 'New' buyers to 'Returning' via post-purchase coupons. Reward 'Loyal' (121 customers) with early access, free shipping, and exclusive deals to match Amazon Prime value proposition.

ANALYSIS III | Seasonal Trends & Monthly Revenue (2018)



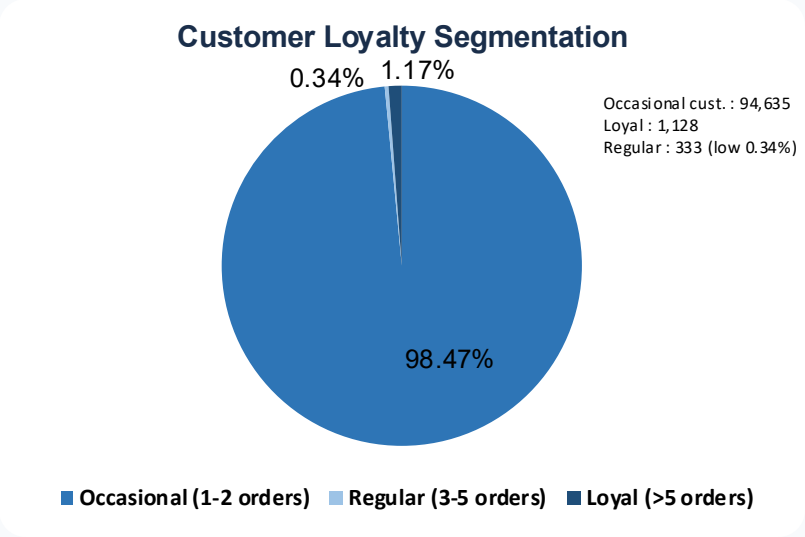


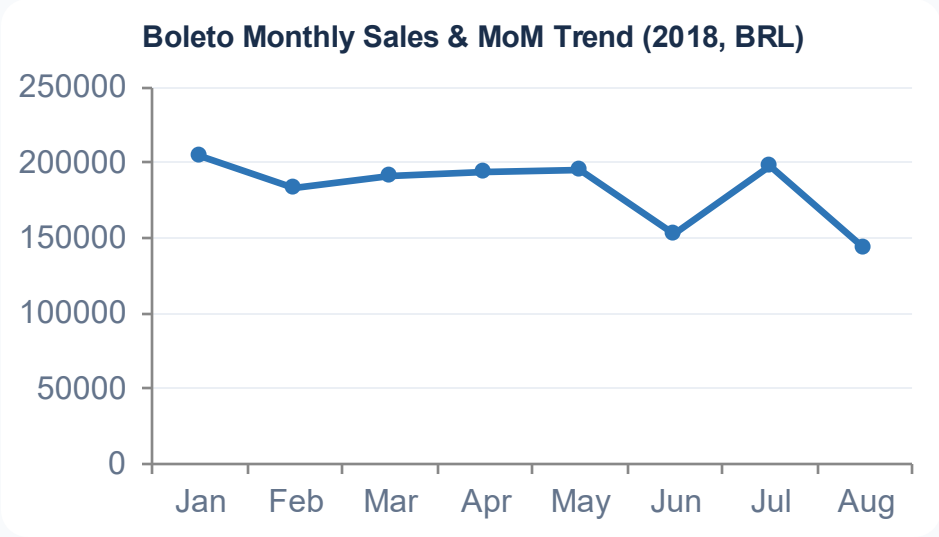
Above-Avg Products:
Top product (ID: 422879e10f46682990de24d770e7f83d) **sold 793 units — 4× above avg.** These are fast-movers and need inventory priority.

2018 Revenue Insight:
Revenue peaks in Mar–May (BRL ~983K–996K/month). Feb is the weakest month. Plan Special Day campaigns to bridge Feb dip. In September 145 is total revenue lower than expected.

💡 **Recommendation:** Map Brazil's Spring (Mar–May) to India's pre-summer (Feb–Apr) consumer surge. Stock inventory for fast-moving products 6–8 weeks in advance. Create Brazil-like 'Hot Summer' sale campaigns aligned to India's June–July heat wave period.

ANALYSIS III | Loyalty Segments & Payment Growth





Occasional buyers = 98.5% of total base — every 1% conversion to Regular adds ~950 customers to recurring revenue pool.

Boleto (India: COD) MoM growth peaked +27% in Feb–Mar. Autumn dip (-25%) suggests need for mid-year promotions.

Credit card MoM growth is most stable — priority integration with UPI/RuPay for India market.

BUSINESS RECOMMENDATIONS FOR AMAZON INDIA

01

Digital Payment Ecosystem

Invest in UPI, credit card EMI & BNPL partnerships. Model: Brazil's 73.9% credit card dominance.

02

Seasonal Campaign Calendar

Peak: **Feb–May (pre-summer) & Oct–Nov (Diwali).** Budget 60% of marketing spend around these windows for better outcomes.

03

Loyalty Program Launch

96% of buyers are one-time. A Bronze→Gold tiered program with coupons, early access & free delivery can make 2× retention.

04

Category Prioritization

Lead with **Beauty & Health(beleza_saude), Watches/Gifts(relogios_presents), Home Linen(cama_mesa_banho)** — highest Brazil revenue. Localize for Indian preferences.

05

Inventory & Supply Chain

Pre-stock fast-moving products (top 10 by qty sold) 6–8 weeks before peak months. Reduce stockout risk and better Revenue generation.

06

Catalog Data Quality

Fix NULL/single-char product categories. Enforce data validation at seller onboarding. Improves search & discovery.
